Description

As a seasoned psychiatrist, I work with my clients to understand the underlying cause of their mental health concerns, and work with them to establish a medication regiment that addressed their issues while maintaining a balance of a productive and joyful life.

With over 20 years of experience in psychopharmacology it is essential that the right dosage is achieved, allowing my clients to enjoy their life to the fullest while fully managing their mental health conditions. I find that the opportunity to help my clients is fully rewarding, when I see how much their lives have improved from our first session.

I am currently offering fully virtual appointments, thus eliminating the need for my clients to drive into the office, arrange time off from work or child-caring services. I would be happy to see you from the comfort of your home or wherever you may be!
