## **Description**

Tinted Teal, inspired by the opulent Indian heritage, through its bold yet intricate pieces, depicts a mesmerizing affair between the delicate elegance and unabated tenacity of woman. Established in 2014, Tinted Teal offers high-quality products that are handcrafted with the highest attention to detail by skilled craftsmen and gradually increasing women-force in the Indian rural workspace. We started with 100% male artisans in our workshop and now have an equal number of women working to support themselves. We take pride and strive to continue to support our artisans through employment, training and women empowerment.
